

➤ **Mainly application**

This machine is used for thermoform all kinds of shapes, in the blister packing of toys, hardware, foodstuffs and electronic products

➤ **Character**

- Mini style, save cost and space
- Compacted shape, which is for convenient transportation
- Easy and convenient operation and maintenance
- Sheet by sheet feeding manually, which is for saving cost
- Automatic output
- Easy operation, just need of manual loading material
- Heating element is separated control, by which to keep the temperature even
- Automatic roller feeding is available (under request)
- Laser positioning

Laser positioning	
➤ Mainly parameter	
Model:	KLY-610/560
Forming length	610mm/maximum
Forming width	560mm/maximum
Forming height	150mm/maximum
Bottom mould stroke	200mm
Suitable sheets	610mm/maximum
Productivity	100~300 times/hour
Forming thickness	1.5mm / maximum
Heating power	500W*25
Temperature control	Separated infrared electronic control for each
Vacuum pump	25m ² H
Consumable power	6--12.5KW(MAX)
Power supply	AC380V 50/60Hz
Air compressor	3HP
Overall dimension	(L)2750mm*(W)2100mm*(H)2100mm
Net weight	1000Kg
